DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment filed on January 26, 2006 in which applicant responds to the claim rejections. Claims 34, 35, 38, and 55-67 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 34, 35, 38, 55-58 and 60-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pascal et al. (WO 98/00210 in view of Giacalone, Jr. (US 5,758,875).

The rejection as stated in office action, paper no. 10202005 is maintained and incorporated herein.

3. Claim 59 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pascal et al. in view of Giacalone, Jr and further in view of Okada (US 4,508,345).

The rejection as stated in office action, paper no. 10202005 is maintained and incorporated herein.

Response to Arguments

4. Applicant's arguments filed January 26, 2006 have been fully considered but they are not persuasive.

Art Unit: 3714

5. Applicant alleges that the prior art fails to disclose the limitation of altering the rate of play automatically in response to at least one selected game outcome of at least one game of chance. Examiner respectfully disagrees. Pascal et al. teaches a tournament gaming system in which players are rewarded for how rapidly they play during the tournament play therefore the outcome of the game causes a change in the rate of play therefore, the game of Pascal et al. in combination with the play rate adjustment means of Giacalone Jr. would result in a device that reads on the claims.

6. Applicant alleges the prior art fails to disclose permitted rates of play, but instead discloses actual rates of play. Examiner respectfully disagrees. The invention of Giacalone Jr. monitors the actual rate of play and adjusts the permitted rate of play accordingly. Therefore there is a momentary difference between the actual rate of play and the permitted rate of play before the machine can adjust the rate of play.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Acres (US 6,254,483) discloses a method and apparatus for controlling electronic gaming devices based on various parameters such as rate of play.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3714

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
